

COMPANY PROFILE

Cibecs is the easiest way to backup and recover data on all desktops and notebooks in your business.

Cibecs allows for central control over what data should be backed up, and when, thereby taking the users out of the equation without them being affected in any way by the automated backup procedure. Current estimates are that up to 80% of users never backup their business critical data, which strengthens the need for Cibecs' easy, reliable and secure data backup and recovery solution.

Cibecs was established in 2004 and has, over the last five years, advanced its product and service offering to not only be among the best in the industry – drawing investment and interest from globally respected partners – but also managing to keep the solution extremely cost effective.

Headquartered in Johannesburg, South Africa, Cibecs has strategic partners located around the globe. We are able to deliver an enterprise desktop and notebook data backup solution that is reliable and easy to implement and use, to companies of all sizes anywhere in the world.

Cibecs has been selected as the product of choice by major industry players and is offered by these strategic partners as part of a service offering or as a standalone product with various service and implementation options available.

Thousands of business users across the globe trust Cibecs with their business critical data. Corporate clients include UTI, BHP Billiton, Unisys, Dimension Data, Nampak, Fedics, University of Witwatersrand and the South African National Prosecuting Authority to name a few.

In December 2008 Hasso Plattner Ventures Africa, personal investment vehicle of Prof. Dr. Hasso Plattner,

co-founder of SAP, acquired a stake in Cibecs (Pty) Ltd. This partnership has opened the door for even greater global expansion by linking Cibecs to Hasso Plattner Ventures' global network of business partners – as well as access to its close relations in the international Venture Capital industry.

"We believe in the Cibecs product offering that has proven itself as the most efficient corporate user backup solution available and were impressed by the extremely positive feedback from the market. Using it ourselves we look forward to assisting Cibecs in accelerating its globalization."

*Andrea Bohmert
Co-Managing Partner - Hasso Plattner Ventures Africa*

With an established network of partners and a highly skilled team, Cibecs customers and partners are assured of comprehensive, effective and efficient support.

With extremely fast recovery, world class security and extensive central control over your users' backups, Cibecs is the easiest and most convenient way to backup and recover data on all desktops and notebooks in your business. Along with highly competitive pricing, it's the logical choice.
